

Master in Computer Application (MCA) (Two Years Programme)
1st Sem
(Credit Based Evaluation and Grading System) (Batch 2024-26)
(2224)

Paper: CSL-4055 Design of Programming Languages

Time Allowed: 3hrs.

Max. Marks: 70

Note: Attempt five questions in all by selecting one question from each section and the fifth question may be attempted from any section.

Section-A

1. Discuss the different programming language paradigms. (14)
2. Explain the different stages of translation in detail. (14)

Section-B

3. Discuss various tree-structure representations of expression with examples. (14)
4. Differentiate static storage management, stack-based, and heap storage management. (14)

Section-C

5. Differentiate static storage management and fixed heap and variable heap storage management techniques. (14)
6. Discuss local and shared data and its various parameter transmissions in detail. (14)

Section-D

7. How we can access various types of data members in C++? Explain with the help of an example. (14)
8. Differentiate Lists and Arrays in Python. Discuss how we can use arrays in python with examples. (14)
