

Department Of Computer Science
MCA(TYP) Semester-II
CSL4094: Open Source Software
MID Term

Time Allowed: 1 Hour

Max. Marks : 30

Note: Attempt all Questions.

Q(1). How do different licenses affect proprietary organizations' use of open source software, and how do they protect the original author's code integrity and copyright? (4.5, 3)

Q(2). Which business models can open source software companies adopt for monetary benefits? Explain any three of them, including their advantages and challenges. (7.5)

Q(3). What steps should an individual take to effectively participate in FLOSS projects? What skills are necessary for meaningful contributions? (5, 2.5)

Q(4). Explain the significance of version control systems in FLOSS development. How does Git facilitate local development and sync changes with a remote repository? (4, 3.5)
