

Sr.No.4115

**Master of Computer Application (MCA) (Two Yrs Programme) - 3rd
Semester (Batch 2024-26) (CBEGS)
(2225)**

Paper: CSL5040 : Mobile Computing

Time allowed: 3 hrs.

Max. Marks: 70

Note: Each question carries equal marks. Candidates are required to attempt five questions, selecting at least one question from each section. The fifth question may be attempted from any Section.

Section A

Ques 1. How do mobile networks work? Discuss the basic connectivity terms used while placing a call in a mobile network. [14 marks]

Ques 2. What is virtualization? Discuss the various types of virtualization with respect to their use in Mobile Computing? [4+10 marks]

Section B

Ques 3. What is an Edge Cloud? What do you understand by Mobile Edge Computing? How is it different from Mobile Cloud Computing? [4+4+6 marks]

Ques 4. Elaborate on the computation model of Mobile Edge Computing used for local execution and full offloading. [14 marks]

Section C

Ques 5. Write a note on various Caching Performance Metrics used in Mobile Edge Caching. [14 marks]

Ques 6. Discuss the hierarchical architecture of Mobile Edge Caching. Also write a note on Caching Service Design based on D2D Services. [10+4 marks]

Section D

Ques 7. Discuss the fundamental characteristics of 6G. Also give a use case of integrating MEC into 6G. [10+4 marks]

Ques 8. Write a note on various challenges of integrating MEC into 6G. [14 marks]
